SWIMMING POOL DRAIN

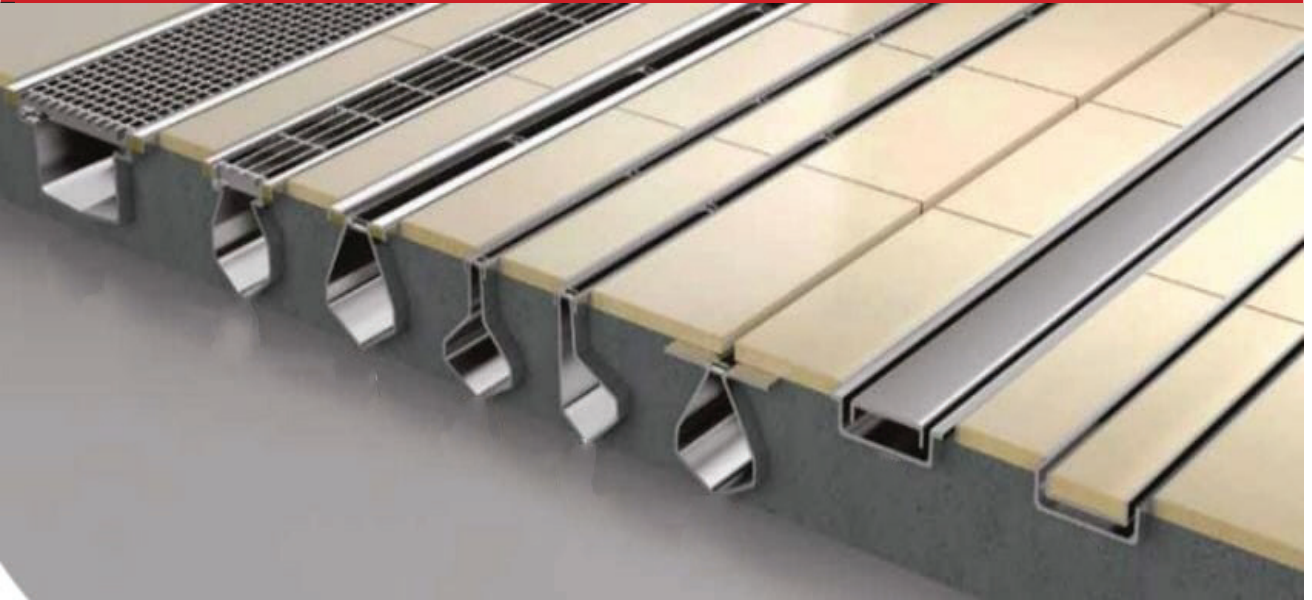

BEST DRAINAGE SYSTEM

Our strengths lie in rapid production, premium materials, customization, and a dedicated team ready to assist our customers. Alongside an extensive selection of drainage systems, including slot channels, floor drain, channels with grates, gullies with grating, and recessed manhole covers—all crafted from AISI 304 or AISI 316 stainless steel—we are excited to introduce the new Miellat Industries total hygienic line.

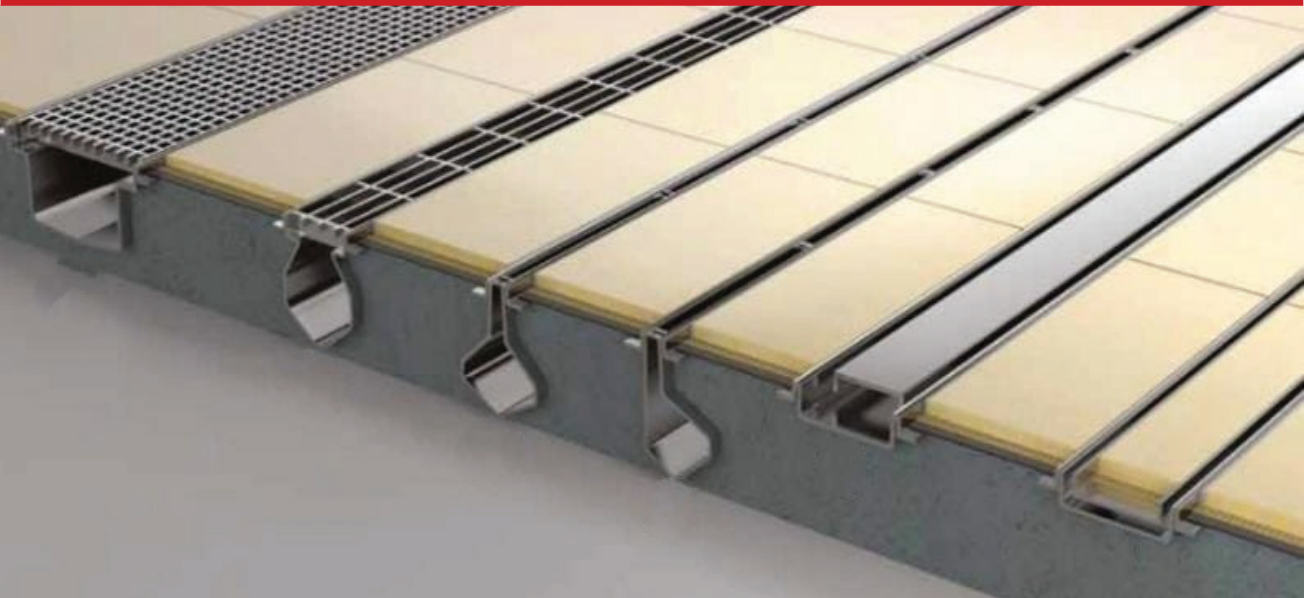

The total hygienic systems not only meet the strictest hygiene standards to prevent harmful bacterial contamination, but they are also crafted to safeguard employee health while ensuring durability and high load capacity.
